

# CONTRACT SERIES

- The side and bottom channels encase the black-out shade fabric eliminating the light from the edges of the shade
- This system is also designed to allow shades to be integrated into the ceiling for concealment above the drop ceiling.

This system is ideal for outdoor restaurant dining enclosures, screen room enclosures and patios. This can also be used with a screen shade fabric creating a room that lets you see out while keeping unwanted insects from entering the area. It also minimizes the movement of the shade fabric due to wind and outdoor elements.

POCKET SIZE	WIDTH A	HEIGHT B
3"	3.625"	3.50"
4"	4.513"	4.09"
5"	5.00"	5.00"
