

# WIRELESS SWITCHES AND SENSORS

## 5 CHANNEL WIRELESS RTS WALL SWITCH

One touch privacy helps create the ideal environment. The battery powered RTS wall switch controls the roller shades and may be operated when entering or exiting a room. The switch may be seamlessly installed without wiring next to any light switch or stand alone. Available from 1 to 5 channels.

Available in White, Ivory and Black

Length: 4.5" Width: 2.75" Depth: 1.25"

## INDOOR WIRELESS RTS SUN SENSOR

This wireless sensor uses the intensity of the sun to provide automatic control of roller shades. The sensor automatically adjusts the shades to the changing sunlight to provide energy savings throughout the day. Compact design blends easily with interior decor. May be mounted on the window or table with a clear suction cup (included) for installation flexibility. Can also be turned on and off with an internal switch when not needed. Light sensitivity can be adjusted and controlled with an internal dial.

Length: 2.1875" Width: 2.1875" Depth: .75"

## INDOOR WIRELESS RTS SUN & TEMPERATURE SENSOR

Automatically adjusts roller shades to the changing sunlight and indoor temperature to provide energy savings throughout the day. Compact design blends easily with interior decor. May be mounted on the window or table with a clear suction cup (included) for installation flexibility. Can also be turned on and off with an internal switch when not needed. Light and temperature sensitivity can be adjusted and controlled with an internal dial.

Length: 2.1875" Width: 2.1875" Depth: .75"

## RTS WIRELESS PROGRAMMABLE WALL TIMER

This wireless combination timer wall switch may be programmed to automatically adjust window coverings at preset times throughout the day. This feature provides added security to any unoccupied space by creating normal daily roller shade events.

Length: 3.125" Width: 3.125" Depth: 1"
